

Laser and Aesthetic Clinic

where beauty and aesthetics meet

81 Woodfield Avenue, Gravesend, Kent DA11 7QQ

Tel: 01474 249957 Email: kentlaser@outlook.com
www.kentlaser.co.uk

Welcome to the Laser and Aesthetic Clinic, where beauty and aesthetics seamlessly blend.

The Laser and Aesthetic Clinic was established in 2000 and has introduced an increasing number of treatments over the years.

Hair reduction and skin rejuvenation treatments are administered by qualified Aestheticians whilst injectables, minor surgical procedures, and sclerotherapy are administered by Dr Jayesh Patel who is a member of the British College of Aesthetic Medicine.

The clinic prides itself in total commitment to the quality of treatments offered and aims for total client satisfaction.

Consultations with the doctor incur a consultation fee that is redeemable against the treatment cost.

Gentlemax Pro (Alexandrite and Nd YAG Laser) Treatments

These methods of permanent hair reduction are the gold standard for the treatment of both facial and body hair in men and women. The variety of lasers helps us to tailor the treatment to ones skin type in order to get the most effective treatment, dealing even with fine downy hair. We recommend that you have a free consultation and patch test before booking a course of treatments.

Hair
Reduction

CO2 Laser Skin Rejuvenation and Resurfacing

This is a fractional laser that does not have the prolonged downtime of the conventional CO2 laser, yet delivers similar results. It is a treatment for fine lines, acne and surgical scar reduction, photo ageing and pigmentation and can also help skin laxity.

Rejuvenation
and
Resurfacing

Full Face

£1000

Smokers Lines

£500

Acne Scarring

£600

Dermapen

The Dermapen™ is the next generation of micro needling. It aims to tighten, lift and rejuvenate the skin. The Dermapen can visibly improve the appearance of fine lines, wrinkles, acne and surgical scars, stretch marks, pores and pigmentation.

Price £250 excluding products

Microdermabrasion (Medical Grade Machine)

Microdermabrasion is a term used to describe the technique of abrading the skin with fine sterile silica crystals to remove a layer of dead skin cells. Medical products are then applied to the skin which facilitate an increase in turnover of the skin cells and collagen formation. Following the treatment, skin will feel softer, smoother and look brighter. It is an excellent treatment for a special occasion and anti-ageing. This treatment can be combined with a mask to hydrate the skin following the treatment.

Price £55 / £65

Stretch Mark Reduction

These are treated by microdermabrasion or Dermapen and can be combined with product usage for quicker results.

Microdermabrasion

£100

Dermapen

£250

Skin Rejuvenation and Resurfacing

IPL (Intense Pulse Light) Photorejuvenation

This treatment is primarily used for irregular skin pigmentation from sun damage or to minimize pore size. It can also be used for those wanting to brighten up their skin tone. The light is absorbed by the pigment within the cells. This generates heat that destroys the pigment. The skin may look darker for a few days following the treatment and the area can flake. The treatment results in fresh, clearer looking skin.

Skin Peels

ZO Ossential Stimulator Peel

The Ossential Stimulator Peel is gentle on the skin but strong enough to make a visible difference, brightening and refreshing the face for a youthful, luminous look. This peel contains 3 different acids to exfoliate your skin and promote cell turnover; with 10% Glycolic Acid, 10% Lactic Acid and 10% Citric Acid. It helps to dissolve dead skin cells and give a great exfoliation to the upper layers of the skin. The salicylic acid works on oily, acne prone skin, the lactic acid promotes collagen production and reduces pigmentation and the citric acid gives the skin a healthy glow. Results include soft radiant skin, with noticeably reduced fine lines, glowing complexion and improved tones and texture and clarity. There is no downtime associated with this peel. Using the Ossential Stimulator peel with other ZO products and protocols can enhance the effectiveness of the treatment.

Price £75 / £100

Obagi Radiance Peel

This facial peel can be combined with the Obagi product systems for enhanced results. It provides an instant radiance for most skin types. The peel can improve a range of skin concerns, including photo-damage and dull looking skin, and results in an overall improvement in texture and tone. It provides instant radiance, tighter, smoother, brighter looking skin after just 1 treatment and has no down time.

Price £75

Obagi Blue Peel

The Obagi peel is a deep physician administered peel that is used for the face and under the eyes. As it is a deep peel, there is downtime of around 7 days. Following this, you will notice that the skin looks brighter and any pigmentation will be reduced. To prep the skin before this treatment, the Obagi range of products should be used for 6 weeks prior to the peel.

From £500 excluding products

Agera Peel

Agera skin peels have the ability to gently improve the appearance of the skin by increasing the renewal of skin cells, enhancing collagen production and refining pore size. Suitable for those requiring a light, superficial peel. Due to the high salicylic content Agera Peels are suitable for acne prone skin. There is no down time with this treatment which can be combined with microdermabrasion for a greater result.

Price £75

Velashape

Velashape is used to target areas of cellulite and can also help with body re-shaping. It uses radio frequency, infra-red, vacuum and mechanical massage to tackle the appearance of cellulite. The treatment boosts circulation, lymphatic drainage and safely delivers heat into fatty tissue to target loose or dimpled skin. This in turn firms problem areas and leads to toning and firming of the skin surface.

Price £100 per session

Nd YAG or IPL Thread Vein Treatment

The Nd YAG laser is used to treat fine red thread veins on the face or legs. It also treats cherry angiomas. For diffuse redness, IPL yields better results.

Price from £80

Sclerotherapy

This treatment uses a series of injections to treat larger thread veins (>0.5mm in diameter) to minimise their appearance. The polidocanol injections cause inflammation of the inner lining of the vein. The vein is then compressed with compression dressings and support tights. The inflamed areas stick onto each other, leading to clearance of the vein. Normally a 60% improvement is expected after 1 treatment.

Price £200

Semi Permanent Make-up

This is semi permanent form of tattooing, used to define lips, eyes and eyebrows. Colours can be chosen from a large selection of pharmaceutical graded pigments.

Botulinum Toxin

Botulinum Toxin injections are used to treat frown lines, forehead lines, laughter lines, neck lines, migraines and for excessive underarm sweating. Effects last for 3-4 months and for treatment for sweating 6-8 months. There are also other more advanced indications for this treatment.

1 Area	£150
2 Areas	£250
3 Areas	£300
Hyperhydrosis Underarms/Hands	£400
Migraine	£400
Nefertiti Lift	£280

Juvederm/Teosyal

Juvederm and Teosyal are hyaluronic acid (HA) fillers used to treat nose to mouth lines, lip lines, very deep frown lines and for lip contouring and enhancement. They can also be used to sculpt the face. Effects last from 6-8 months.

Juvederm 0.5ml	£250
Juvederm / Teosyal 1ml	£350
Juvederm Voluma / Teosyal (Cheeks)	£400
Cheek Dent	£350
Tear Trough	£500

Skin Boosters

Skin boosting is the use of Hyaluronic acid specifically to treat the skin itself, adding hydration, bounce, tone and plumpness. Restylane Vital is a hyaluronic acid specially engineered to add hydration and volume to the skin. This treatment is suitable for the face and back of the hands. We recommend three treatments at monthly intervals for best results.

Skin Boosters	£250
---------------	------

Profilo

Profilo is the new hyaluronic acid complex for bio modelling of the skin to treat skin laxity. It can be used to treat the face, neck, arms, hands and décolletage. Usually two treatments are required at 4 week intervals.

Profilo	£300
---------	------

Lipolysis

This treatment involves injecting the area to be treated with a soya bean based product to rupture the fat cells and subsequent drainage by the lymphatic system. It is especially useful for jowls and double chin.

Price £350

Dracula Facelift (PRP)

The platelet rich plasma (PRP) is extracted from your own blood after centrifugation to separate the various parts of the blood. This is then reintroduced back into the face by way of injections and micro needling. The platelets have a rich array of growth factors and these help to rejuvenate the skin and reduce bone loss from facial bones that occurs with age. It can be used to treat the forehead, cheeks and jaw bone. The filling effect of PRP is not as obvious as a filler. The treatment is usually repeated at 6 month intervals.

Price £500

Dracula
Therapy

PLEXR Treatment

Hooded eyelids caused by an extra fold of skin that covers the skin of the upper eyelid causes a tired and aged look. Until now there was only surgery to remove the excess skin but now there is Plexr. The Plexr pen uses a beam to sublimate the excess skin without damage to the underlying structures. The treatment results in tissue retraction and tightening giving outstanding results.

Upper and Lower Eyelids

Blepharoplasty

PDO Thread Lift

PDO therapy is an effective cosmetic technique that lifts and tightens sagging skin tissues by inducing collagen production. It involves the implantation of fine, absorbable threads (similar to those used in medical suturing) into the skin using small needles. This treatment can effectively strengthen the contour of the face, lift loose skin, jowls, nasal labial folds and neck. The threads are biodegradable and provide immediate lifting and promote collagen production to maintain the lifting effect and improve skin tone. Results last between 12-15 months.

Clinic Products

ZO

The ZO range, developed by Dr Zein Obagi after 3 decades of research offers a revolutionary portfolio of products. The range consists of ZO Medical (Therapeutic Solutions) and ZO Skin Health Products (Daily and Preventative Skincare.)

ZO Medical, Therapeutic Solutions are used to target skin conditions including acne, pigmentation, sun damage and skin ageing. As the range has medical grade ingredients, they are prescription only products. Product protocols are created by our aestheticians following a skin analysis and understanding of the clients skin concerns.

ZO Skin Health (Daily and Preventative Skincare) range helps to promote overall skin health and offers protection from environmental factors and is suitable for clients of any age, ethnicity or gender.

Obagi

Physician prescribed skincare system that transforms the skin at the cellular level resulting in skin that looks younger and healthier, with a glow. Obagi have a number of ranges to suit different client types, from those with heavy pigmentation or to those wanting a good skin care range. Their product portfolio has expanded to include regimes for younger skins to delay the ageing process of their skin.

Our Aestheticians can complete a skin analysis to determine which range is most suitable and follow up treatments are advised to assess usage of the products and determine whether different dosages are required.

The Obagi system can be combined with Obagi Radiance Peels for greater results or with microdermabrasion.
